

```
#include<stdio.h>
#include<string.h>
int main(){
    char sir[30] = "01b20r34d50"; // 101-20
    int x = 0;
    int i;

    for(i = 0; i < strlen(sir); i++){
        if(sir[i] >= '0' && sir[i] <= '9'){
            printf("%c - %d\n", sir[i], sir[i]);
            x = x * 10 + sir[i] - '0';
        }
    }
    printf("x = %d\n", x);

    return 0;
}
```
